

Redesign business with AI

Use what you have learned to rethink processes, teams and opportunities to create value.

AI-Native Organisations

10 hours

5 sessions of 2 hours

Human-Agent Orchestrator Academy · Kaikaku Labs · Module guide

The topics, in plain language

01

A bigger ambition

Question today's limits and look for large shifts in capacity. Treat big multipliers as something to test, never as a given.

02

Organisations built to scale

Principles from organisations that use technology, experiments and shared resources to reach further.

03

An AI-native organisation

Design processes with people and AI working together from the start.

04

Layers of intelligence

Link data, knowledge, tools, agents and decisions to the way the business runs.

05

Organisational redesign

Review roles, processes, indicators and governance, and test a new way of operating.

Why it matters

Change goes further when an organisation looks at how it works and measures the results. You connect orchestration to a real business initiative.

What you will be able to do

- Map a transformation opportunity in a real process.
- Connect people, data, tools and decisions.
- Propose a pilot with an expected outcome and a success indicator.

An everyday example

Redesign sales monitoring so information gets gathered, analyses get prepared and decisions get support, with each person's responsibilities still clear.

How to apply it

- 1 Choose a process and describe its current problem.
- 2 Design the intended collaboration between people and AI.
- 3 Define a limited pilot, a metric and the decision to make after the test.

Your first application

We will transform _____. The pilot involves _____. We will know it is worth progressing if _____.

Fill in the blanks with your own work. This is the deliverable you take out of the module.

Materials

Transformation map; pilot brief; indicator dashboard; organisational review guide.

Planned for the classes of this module.

**Before
you start**

An integrated understanding of [L05](#) to [L08](#). Leaders can explore the proposal before taking the practical sessions.

CHOOSE THIS IF

I want to transform a team or business with humans and AI working together.
